

# Think Green

## POST-DOCTORAL AND PhD STUDENTSHIPS

Applications are invited to join the **Enzyme Technology Research Group** in the Faculty of Applied Sciences at the Durban University of Technology for a multinational research project on **“Bioprocessing of agricultural for eco-sustainable production of biofuels and byproducts.”** South Africa has committed itself to a future Green Economy and this is an opportunity to conduct research in this area. Successful applicants will join an international inter-disciplinary group, with opportunities to work closely with established researchers and for international travel to collaborating universities and conferences. Research teams in all five BRICS nations are part of the project.

Potential candidates must demonstrate strong interest and self-motivation in this research area, possess good computational skills and the ability to think analytically and creatively. Good presentation and writing skills in English are required.

One **South African** post-doctoral (R400 000) and three PhD (R150 000) stipends are available.
